MIKADO PENINSULA.

Various Veins Yielding in a
Paying Manner—Prop-
erty very Valuable.

Without any loss the owners of
the Mikado have been quietly developing
their property on the Mikado Penin-
sula, under the supervision of
Mr. James Trotter. The following
information will be of interest to
the public. So far seven veins have
been found and partially developed.
The first vein, which is the main
one, is a good sized vein, and has
been found to be a good sized vein.
The second vein, which is a good
sized vein, has been found to be a
good sized vein. The third vein, which
is a good sized vein, has been found
to be a good sized vein. The fourth

PLANS FOR PENSIONS.

C. P. R. Arranging for Old
Age Grant to its Employees
W. R. Baker in charge.

Montreal, Que., Nov. 14.—The C.
P. R. is rapidly maturing its plans
for pensions to its employees for
which the sum of \$250,000 was voted
at the last annual meeting. They are
not yet complete, but W. R. Baker,
assistant to the second vice president
will be assisted by a pension board
of most competent employees.

Over 35,000 employees will be affected
and, unlike the hands of the Van
derbilt and other systems where pen-
sion funds are in force they will not
be required to contribute anything.

It is announced that a committee
of the C. P. R. trainmen, who have
been here for some weeks, have reach-
ed an agreement with the company.
A new schedule will be issued in a
few days.

NEW ONTARIO.

And Its Capabilities. Value
of the Country Greater
Than Supposed.

Those who fondly imagine that On-
tario is too well settled to have new
land, will be surprised to know that
only twenty per cent. of its area is
yet settled. Over 80 per cent. being
still in the hands of the Crown.
There are still 100,000 square miles
unsettled, and this is a considerable
portion of almost unexplored territory.
The province is 750 miles from the
Atlantic to the Pacific, and has a
coast line of 1,200 miles. It is a
large and fertile country, and has
a great many fine lakes and rivers.
It is a country of great natural beauty
and is well adapted for agriculture
and stock raising. It is a country of
great natural resources, and is well
adapted for the development of its
mineral wealth. It is a country of

EAGLE LAKE PROSPECTS.

The Northern Light Com-
pany Pushing Matters
Rapidly Ahead.

All eyes interested in mining in
this district, have been turned to the
Eagle Lake prospects for some little
time, and any news from there is
eagerly demanded. The Northern
Light Co. had the chance of getting
a nice little two stamp sampling mill
for a song, this has proven invaluable
to them, and a boon to the other
prospectors who wish to put their
sample lots of ore and get a fair
idea of what it will mill. Assaying
is well in a way. For instance, it is
necessary for a mine manager, to
know the values of the different por-
tions of the mine, when he has one-
but in the average prospect assays,
are prone to deceive as they give the
whole value, whereas, if seventy per
cent. of this is recoverable on the
plates, it is not to be sneezed at,
and it may pay to let the other 30
per cent. go, rather than lose time
and labor in treating it.

Mr. N. Higbee, manager of the
Northern Light Co., returned from
Eagle Lake this week and reports
everything moving along smoothly,
and rapidly. His little two stamp
has been out into perfect shape, for
another mill run, which he intends
making before Christmas. On the
Dorado, one of the Northern Light
properties, double shifts of men are
pushing down the shaft as rapidly as
it can be done. The values still con-
tinue, and the ore increasing in its
width. On M. H. 216 another of the
company's properties, sinking is be-
ing done by a single shaft. Both the
and at the El Dorado, work will go
on all winter and several mill runs
will be made, from both shafts.
Their steamer "Caro" made its last
trip for the season to the different
mines on Monday the 7th inst., and
is now laid up at Vermilion Bay,
where she will be repaired and re-
fitted for next summer's work.

Mr. R. H. Ahn completed his sec-
ond mill run for the Baden-Powell,
at the Eldorado mill a few days ago.
This was most satisfactory. Mr. Ahn
is now sinking a new cross shaft,
and is finding the wonderful show-
ings on the surface continuing as
the goes down. Some of the most
specimens ever seen here came from
the surface of the Baden-Powell, and
are far greater than had been

LONDON.—The Marquis of Ang-
 lesey, whose lad for jewelry and
 pantomime acting and his other vag-
 abonds are well-known, has now de-
 veloped a delicate aestheticism along
 another line. He is an enthusiastic
 automobilist and the fastest and the
 most reckless of drivers in the United
 Kingdom. He has been fined several
 times in the police court for this
 account. But there is one re-
 proach that cannot be leveled at him.
 It does not leave behind an evil
 smell as others, but the perfume of
 violets or other flowers.

The owners of this valuable prop-
 erty live on the first part in St.
 Paul, and are to be congratulated on
 their outlay.
 For the present, a Denver whinn is
 used in the building. This will
 be kept in service for the winter
 during which time snowing will be
 continued. In next spring the prop-
 erty will be so well on that a
 steam house and other machinery
 will have to be installed. Manager
 Gordon will take out a number of
 men as soon as it freezes sufficiently
 for winter travel and while he is
 very guarded in his information he
 considers the M. D. property "the
 best he has seen in the district."
 There are two other great veins
 upon the property each over 100
 feet wide. These appear to be sim-
 ilar to the No. 1 vein but as little
 work has been done on them their
 values have not been ascertained.

A HITCH AT BRANDON.
 CITIZENS MAY HAVE TO BUILD
 A NEW RINK—A BONUS OF
 \$1,000 IN SIGHT.
 Brandon, Nov. 14.—There is a bit
 of hitch in the proceedings with refer-
 ence to the acquisition of Brandon Ice
 rink to the senior series of the M.
 and N. W. League. Since the meet-
 ing of the club, and the committee
 of Winnipeggers appointed to inspect
 the rink, Manager Parham, of the
 Victoria Rink, has raised down the
 proposed improvements necessary
 to allow the Brandon team into the
 rink ranks. In consequence a meet-
 ing of citizens was held last night
 and it was suggested to build a new
 rink right away. One member of the
 league offers a bonus of \$1,000 to
 a company which would undertake the
 work. A company is being organized
 today to accept, and the probability
 outcome is that Brandon will have
 a new, modern rink. A meeting of cit-
 izens is called for this evening to dis-
 cuss plans.

CANADIAN PACIFIC.

**WILL CARRY A PARTY FROM
 THE NORTH ATLANTIC.**
 Montreal, Nov. 14.—The Canada
 Pacific will carry this month to
 the Imperial Government, a party
 from the North Atlantic, to the P.
 de marines, numbering forty-four
 and one officer, sailed from
 England, Nov. 6th, on the Albatross
 steamer, Persian. They disembark at
 Halifax, where they will be taken by
 the C. P. R., and carried to Esqui-
 maut.

FORTY PRISONERS ESCAPE.

**OVERPOWERED THE JAILERS
 IN BROAD DAYLIGHT.**
 Tucson, Ariz., Nov. 14.—Forty of
 the prisoners confined in the jail at
 Cananea have overpowered the jail-
 ers, and escaped in broad daylight.
 The men were charged with different
 offences, ranging from petty larceny
 to murder. This is the second jail
 delivery in a month, and a new pris-
 on is being cut out of the side of the
 mountain, where escape will be ac-
 cording to impossibility.

Those who today imagine that the
 world is too well settled to have any
 more changes, will be surprised to know
 that only twenty per cent. of the
 area is settled, and that the rest is
 still in the hands of the forest.
 There are still 10,000 square miles
 of unexplored land of this a continent,
 and perhaps almost anywhere.
 The province is 100 miles long,
 from St. John's to a thousand miles
 east to west. Its northern point
 is James Bay, Hudson Bay, while
 its southern point, further south,
 near Boston of Chicago, is reached
 by Lake Erie.

Regarding the capabilities of North-
 ern Ontario, which contains
 nearly 1,000,000 square miles, and has
 an area almost equal to that of
 southern Ontario, little has been
 recently known. In 1900 the pro-
 vincial government organized a com-
 mittee of exploration parties, which
 traversed the country from Quebec to
 the Manitoba border, and northward
 to the Hudson Bay shore. The result
 has been to demonstrate the fact
 that the value of the country, espe-
 cially as regards its agricultural re-
 sources, is far greater than had been
 supposed. That northern country con-
 tained great forest wealth, and prob-
 ably great mineral wealth, had pre-
 viously been admitted, but the
 bounding fact was not looked for by
 many that an agricultural region of
 great fertility, with an acreage much
 greater than that of the whole of
 Ontario at present under crop, ex-
 tended from Lake Temiskaming on
 the east almost entirely across the
 province. To this section which lie
 between the 49th and 50th parallels
 has been given the name of "The
 Great Clay Belt." Almost the whole
 of this region, which contains 41,000
 square miles, or to 1,000,000 acres, is
 suitable for cultivation, and could
 with ease support a million people
 if it were wooded, and it is watered
 by no less than seven large rivers,
 of over 300 miles in length, flowing
 northward to Hudson's Bay. Nor is
 the climate any obstacle to success-
 ful settlement, for it is in the same
 attitude as southern Manitoba and
 Dakota.

CONVERTED BY GRAMOPHONE.

With the death at Detroit recent ly of Marshall O. Waggoner, ther terminates a life in which some yet strange events have figured. This is the man, who after a successful bus iness career, after a life of study and research that had made him one of the best informed men in America, after years devoted to combating the Christian religion, became a convert to it through the instrumentality of a gramophone. The conversion was one of the most sensational things that has ever come under the notice of the clergy for many years, and Mr. Waggoner was for months overwhelm ed with letters from the prominent ministers of the day asking informa tion as to his conversion. Mr. Waggoner was a scientist, and as such took great interest in the gramophone. He purchased one of the first that was brought to that city and one evening seated alone in his lib rary, surrounded by his parrot, his books, and a fine collection of cur ios was listening to the music of the gramophone when first it gave forth "Nearer, my God to Thee," then "Jesus Lover of My Soul," and as the notes fell clearly, sweetly on the ears of the atheist, the man who for years had combated and reviled the Christian faith, he felt the tears roll down his cheeks, and, moved by some unknown impulse he knelt for the first time in many years. He re mained on his knees until day was breaking and rose from them as strong an advocate of Christianity, as he had previously been its adver sary. So complete was his conversion that he publicly burned in a bonfire, at the steps of the United Brethren Church his library, one of the most complete collections of atheistic writings in the world.

STARVED OUT.

Many a gaillard has been forced to give up the fight and hang out the white flag of surrender, when lack of food has weakened the men past all power to continue the struggle.

Many a man is similarly starved out of business. His digestion is impaired. His food does not nourish him, and for lack of

strength to carry on the struggle he turns his store over to another.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It restores strength to weak, nervous, run-down men and women.

"About ten years ago I began to be afflicted with stomach trouble, also diarrhoea," writes Mr. Wm. Walters, of Antioch, Mo. "I was worried and threw up my hands. I sometimes thought my end had come. I had heard of Dr. Pierce's Golden Medical Discovery, and I bought a bottle and took it. I had only taken a few days' worth when I found I had symptoms of the trouble coming back, so I took the sixth bottle and it cured me. I have enjoyed the best of health this summer, and the credit all belongs to your Golden Medical Discovery. I can't express my many thanks to Dr. Pierce for his remedy. It did so much for me. Words cannot express how severely I suffered. If any doubt the above statement let them address me, and I will take great pleasure in clearing it up."

Dr. Pierce's Pleasant Pellets cleanse the bowels and stimulate the sluggish liver.

GETTING OUR COMMERCE AND INDUSTRY

Americans are pouring into our North-West. They have already poured into British Columbia. Both these regions are in a fair way to become American, as might without the gift of prophecy have been foreseen. We are now told that an American syndicate is going to buy up New Ontario and turn it into an American settlement. Americans are investing largely in Canada and getting our commerce and industry into their hands. All this, by especially the index into the North-West is received with satisfaction. British statesmanship is assiduously cultivating American friendship, and even throwing out more hints of a more intimate alliance. Meantime, Canadian protectionists are appealing to our patriotism for the adoption of an anti-tariff, and the public schools of Toronto are ordered to revive anti-American feeling in the breasts of children by boasting their flag on the anniversary of the battle of Chateaugay. It is a curious jerry in the cross-roads of policy and sentiment.

WAKE UP, BABY!

A New Game for Mothers.
Baby's awakening ought to be looked forward to as a pleasure, not dreaded as a scourge. He should be awakened bright, merry, and full of fun refreshed by sleep, ready for a good time.
How many mothers dread his awakening howls, knowing that he will keep everyone miserable until he goes to sleep and gets his food. These crying fits are the terror of every inexperienced mother. Mrs. Gabriel Barnes, six Mile Lake, Ont., is a mother who has learned how this trouble can be best met, and writes us as follows: "My baby suffered much from indigestion, and was cross and restless. I gave him medicine, but they did not help him. I then got a box of Baby's Own Tablets, and they helped him almost at once, and have done him so much good good that I would not be without them. I can recommend Baby's Own Tablets to all mothers, as the best medicine I have ever used for children." These tablets are guaranteed to contain no opiate or harmful drugs, and can be given with absolute safety to the weakest, youngest infant. Sold by all druggists or sent by mail, post paid, for 25 cents a box by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y.

EDITORIAL NOTES

The American press is somewhat charmed that Canada should have led the way in spanning the Pacific by cable, but is frankly complimentary nevertheless. A company had in hand the project for a cable to Manila by way of Hawaii and it is promised that it will be completed by July, 1903.

During a marriage ceremony at Northeast Harbor, a week ago, the long veil of the bride, in some unaccountable way, became loosened, and fell. A superstitious bride would have been horror-stricken at such an occurrence, perhaps would have faint ed, perhaps postponed the event. Not so this bride; she just stopped the proceedings long enough the readjust the refractory adornment, glanced smilingly at the groom, and then, with a let-the-progression-move look toward the minister, resumed her position at the altar. The reverend

Consumption

Salt pork is a famous old-fashioned remedy for consumption. "Eat plenty of pork," was the advice to the consumptive 50 and 100 years ago.

Salt pork is good if a man can stomach it. The idea behind it is that fat is the food the consumptive needs most.

Scott's Emulsion is the modern method of feeding fat to the consumptive. Pork is too rough for sensitive stomachs. Scott's Emulsion is the most refined of fats, especially prepared for easy digestion.

Feeding him fat in this way, which is often the only way, is half the battle, but Scott's Emulsion does more than that. There is something about the combination of cod liver oil and hypophosphites in Scott's Emulsion that puts new life into the weak parts and has a special action on the diseased lungs.

the old drop off and the young come on, till a day is reached when none of these remain that once were here. How does some form of human speech become extinct? About a hundred years ago an old lady named Dolly Denton, died in Cornwall. She could speak the Cornish language after her death there was nobody that could. This quietly and the living Cornish language became a dead language, and in a like unobtrusive manner have been wrought most of the new beginnings which have changed and are changing the earth.

TORONTO COUNTERFEITERS.

STEWART PLEADS GUILTY TO BUSINESS CONFIDENCE TO THE QUEEN CITY

Toronto, Nov. 13.—J. J. Stewart charged with the forgery of the Dominion of Canada bills in the police court to-day pleaded guilty and was remanded for sentence. Two specific charges were made, "uttering counterfeit Dominion one dollar bills in October, last, and having placed for the manufacture of such bills in his possession, also having glass plates in his possession resembling Dominion dollar bills."

Mr. and Mrs. Raymond pleaded not guilty to the charge of having a counterfeiting apparatus in their possession and were remanded for a week. Inspector Stark now says there is no Montreal end to the business and Stewart and the Raymonds constitute the whole outfit.

An Anglo-Saxons' intended professor of one of the Welsh Universities was observed walking down the street with one foot on the curb and the other in the gutter. "Good morning, professor," said a friend. "How are you?" "Well," said the professor, "I thought I was all right, but for the last half hour I have been lumping in the most unaccountable manner."

Is this the first appearance of the following? It is from the London Times of October 14th, 1892:—One of the Dover inn-keepers who lately complained to a French gentleman, that his house was greatly infested with rats, and that he would willingly give a considerable sum to get rid of them, was, on the following morning, after the Frenchman had received his bill accosted by him. "Sure, I shall tell you vich way you shall get rid of de rat." "I will be obliged very much to you if you really can," replied the landlord. "Well den, only charge de rat as you here charge me, and I will be d—d if de rat vill ever come to your house again."

An English contemporary tells the following good story of muscular Christianity. In a smoking room at a hotel in Dublin, where sat a huge priest, some men were scoffing stupidly about miracles. Up rose the big priest and offered to perform a miracle. He seized the most blatant of the scoffers, and carried him to the door, and kicked him out into the street. When the unhappy youth returned the priest asked: "And did ye break your neck?" "I did not," said the answer. "Well, it's a miracle ye didn't," answered the priest.

ANGEL FOOD.

All that glitters is not brass.

A woman's heart is often nearer Right, than a man's hand.

It is a fine thing to make yourself needed.

Fashionable society is usually nothing but canned life. Look out for explosions.

Should not the men and women of earth appeal to us more than the Angels of Heaven?

The selfish wish to govern, is often mistaken for a holy zeal in the cause of humanity.

Women under thirty seldom know much, unless Fate has been kind and cuffed them thoroughly.

Men differ, not so much in their beliefs about the proper religion, as in their conception of what religion is.

Peace comes to him who brings it, and joy to him who gives it; but a perfect understanding comes to him only who Loves perfectly.

Our quarrel with the world is only our quarrel with ourselves. When we are at peace with self we are at peace with God.

To love one's friends; to battle in the Sunshine of Life; to preserve a right mental attitude—the reception attitude, the attitude of gratitude—and to do one's work—these make the sum of ideal life.

Doukhobors Narrowly Escaped being Frozen to Death.

Winnipeg, Nov. 13.—Frank Pedley, superintendent of immigration to the Dominion government, left last night for Ottawa.

Mr. Pedley said the latest advices from Yorkton, respecting the Doukhobors, were of the most gratifying character.

The story that one of the men has his ankle broken in the scrimmage at Minnedosa was untrue. The man referred to was lame, and had been so for some time past.

About half of the Doukhobor women and children left Yorkton in wagons and in other conveyances yesterday to join their husbands, who would reach the villages before them. In spite of aversion to animal labor they got into the wagons and many appeared anxious for the opportunity to return.

The Doukhobors, Mr. Pedley said, were at that hour safely in their villages. They had asked him for some privileges in being allowed to remain with friends at other villages than their own, and these had been granted.

General Colonization Agent Speers, interviewed, said: "We had little difficulty with the Doukhobors at Yorkton. When they did not march voluntarily, we got them to move along with a little persuasion. They are going back to the villages without any difficulty."

"That was a great move you made at Minnedosa."

"Yes. We got them into the rink, and then filled it with a lot of fine straw to make them as comfortable as possible."

"Were they afraid of the cold?"

"No. They tried once to force their way out of the rink when they knew the weather was very cold."

James Pearson, a delegate from Iowa, passed through Winnipeg yesterday on his way to the south. He was in Minnedosa during the recent troubles with the Doukhobors.

"It was lucky the government got them corralled," he said. "The thermometer was below zero and all would have frozen to death had they been allowed to wander."

Paine's Celery Compound
Has Been Worth Hundreds of Dollars To Me.

A Happy and Complete Cure After
Eighteen Years of Awful Agony.

All weary, disheartened and sick people and those who have lost faith in the remedies they have used in the past, because none of them have given indications of curing results, should now be filled with a strong determination to make use of the one medicine that cures disease—the new agent of new life that saves hopeless and despairing sufferers from all other agencies and means.

The thousands of victims of torturing neuralgia after reading the testimony of Mrs. G. H. Parker, of Winona, Ont., must see, that to avoid a continuance of suffering and the possibility of sudden death, it is absolutely necessary to use Paine's Celery Compound—the only medicine that successfully banishes neuralgia, and kindred nerve diseases. Mrs. Parker says:

"I have been a great sufferer from neuralgia for nearly eighteen years, and my sufferings at times were so bad that words fail to describe them. After having tried a host of remedies, I was persuaded to use Paine's Celery Compound. I am happy to say that I am a different woman and completely cured. I can recommend Paine's Celery Compound, it has been worth hundreds of dollars to me."

Malt Breakfast Food

Builds Them up in Flesh
Bone and Muscle.

Malt Breakfast Food is the only cereal food that children will keep to and relish from day to day. It has a delicious flavor that captivates the taste and makes it a favorite. Oatmeal and other forms of grain foods are injurious to the stomach, and digestive organs of the little because of the presence of insoluble starch. Malt Breakfast Food is the iron starch, therefore easily and quickly digested by the youngest of children. Malt Breakfast Food is specially recommended for the babies after weaning. It affords all the elements for solid flesh forming and bone and muscle building. Try Malt Breakfast Food, dear mothers, and it will give you wonderful results. Sold by grocers everywhere.
